

sofTap™ WiFi Dimmer Master, Tru-Universal, White

ADTP700RMTUW1

The sofTap WiFi Dimmer is designed with an innovative micro-movement functionality, allowing you to turn lights on and off or dim them with a soft "tap" of the finger. And thanks to its patented Tru-Universal technology, this dimmer automatically adapts to any load or combination of loads attached to it, eliminating flicker, early dropout, or "pop-on" deficiencies which can plague other non-adaptive dimmers. Simply pair it with any fixture and you're done!

For WiFi functionality to work, this product must be paired with [The Hub \(LC7001\)](#).
