## **LED Step Light**

## ER3005

## START FROM HERE

- · Make sure power is completely off at the fuse box.
- · Have your fixture installed by a qualified licensed electrician
- · Prepare everything in a clear area.
- · Wear gloves at all times during this installation.
- · Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

**Technical Support:** 1-877-452-6858

## Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

NOTE: In accordance with the NEC and local ordinances the depth of box is determined. Framed mounted junction box: Raco 2" x4" (16.5 cu. In) for outdoor or indoor. Outdoor application: Hubbell-Raco 5330-0 1-Gang, Weatherproof Box, Depth: 2". (5) 3/4" Threaded Outlets (2 in each end, 1 in back), Cubic Inches: 16.0". recommended.

Mortar or poured concrete installation: Use appropriate junction box suitable for that particular application

JUNCTION BOX: 2" x 4" boxes to have minimum inside dimensions of 3"H x 2"W x 2"D in order to accommodate fixtures.

- 1. Remove the fixture from its original packaging. Remove the mounting plate (1c) from within the fixture (1f) by removing the two screws (1g). Pull out the mounting plate (1c) from within the canopy (1f) and attach it to the electrical junction box (1a), using the two screws (1d) provided in the hardware package.
- 2. Attach all wiring with the provided marrets (1b) (white to white "N", black to black "L", ground to ground "G"). Align the gasket (1e) provided before securing the canopy (1f) to the mounting plate (1c). Align the fixture to the mounting plate (1c) and secure using the two screws (1f) provided.
- 3. To prevent moisture from entering the outlet box and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking (see illustration 1). The space at bottom should be left un-caulked to prevent moisture build-up.
